

## DRB UK launches total forecourt maintenance service – Care & Protect

DRB UK, a specialist in all aspects of the petrochemical industry, has launched 'Care & Protect' – a comprehensive planned preventative maintenance (PPM) package for forecourts. This complete solution comprises an intense cleaning and maintenance programme for all site equipment, including dispensers, EV chargers, car wash facilities, lighting, canopies and signage.

Care & Protect is a simple, affordable solution that has been designed to meet the needs of modern, multi-functional forecourts. Business owners can enjoy complete peace of mind, safe in the knowledge that their equipment is maintained to the highest standard and that each site will present a consistently polished appearance.

DRB's service is beneficial for all forecourts across the UK, from independent dealers with a single site to major retail networks. An extensive cleaning process can revitalise ageing sites and provide them with more kerb appeal, whilst newer or refurbished facilities will continue to stay in tip-top condition.

Paul Harrison, Projects Director for DRB, said: "With our extensive experience across the forecourt sector, DRB is in a unique position to offer a total maintenance package that deals with everything required to keep sites working well and looking good. Facilities and services alone are not enough to encourage repeat custom; a well-presented site is what influences consumer perception and builds trust and loyalty."

## **Planned Preventative Maintenance (PPM) packages**

There is a multitude of support levels available with the DRB Care & Protect service contract, as they are all tailor-made to suit core business requirements. The DRB team will guide customers through the options available to create the ideal package for their site or network, based on individual needs, specified time frames and budget. By selecting one trusted supplier for all inspections and remedial works, site owners can stay in control of maintenance costs and reduce the possibility of unplanned call-outs and unforeseen downtime.

### **DRB's Care & Protect Package covers the following areas:**

- Branding (external and internal)
- Signage (external and internal)
- Forecourt canopies and structural repairs
- Main identification display/totems
- External site illumination
- Internal site illumination
- Area/line and floor graphics
- External décor including fuel dispensers
- Internal décor
- Car wash maintenance
- Fuel dispenser maintenance
- Surface/canopy and under sheeting high pressure cleanse
- Vertical surface mould and algae treatment
- Perimeter boundary and fencing repairs
- Weed treatments
- Forecourt cleaning supplies (all requirements)
- Regulatory health and safety notices
- Electrical and hazard area testing

**Retailers can safeguard their business investment by choosing the Care & Protect solution from DRB.**
